vasanthjagani24@gmail.com

OBJECTIVE

To work in a challenging and dynamic environment and to contribute to the profitability of the Organization while concurrently upgrading my skills and knowledge.

PROFESSIONAL SUMMARY:

- Around 5+ years of experience in the development and analysis of Python, Django, and Odoo server technologies-based applications.
- Worked with dockers for containerization.
- Connected a continuous integration system with a GIT version control repository and continually built it as the check-ins came from the developer.
- Worked with the GraphQL API to provide web services and consumed web services while performing CRUD operations.
- Worked with the AWS S3 service for storage.
- Worked on various applications using Python-integrated IDEs Sublime Text, PyCharm, Atom, and Eclipse.
- Strong teaching, and public speaking abilities for a variety of general audiences, including professionals and students.

EDUCATIONAL DETAILS

2015 - 2017

Sri Vasavi Engineering
College, Tadepaligudem

M.Tech (Power Electronics) 71.6%

I have completed my M.Tech in Power Electronics, specializing in power conversion and control systems.

WORK EXPERIENCE

2019 - 2025

Bosco Soft
Technologies Pvt Ltd

Senior Python Developer

with extensive experience in designing, developing, and optimizing scalable applications. Skilled in building RESTful and GraphQL APIs using Django, Django Rest Framework, and FastAPI. Proficient in database management (PostgreSQL, MySQL), implementing automated testing (pytest, unittest), and ensuring code quality through best practices. Experienced in asynchronous task processing (Celery, Redis), performance optimization, and cloud deployments. Strong problem-solving skills with a focus on scalability, security, and maintainability.

ENVIRONMENT

- Python 3.8/2.7
- Django 3.2
- REST API
- GraphQL
- Amazon S3
- eclipse
- PostgreSQL
- GIT

TECHNICAL SKILLS

- Programming/Scripting Languages: Python, UNIX / Linux Shell Scripting (Bash)
- Python Framework: Django, Odoo
- Databases: PostgreSQL, MongoDB
- Versioning Tools: GIT, SVN
- Operating systems: Microsoft Windows, Ubuntu Linux

PROJECTS

Cristo+ (3y 2mo)

Python, Django,
GraphQL, PostgreSQL

Cristo+ is C'S|3 Church Management System for managing all aspects of church operations church membership, congregation management, church registry, church giving and accounting, worship services, event scheduling/management, sacraments, membership insights/reporting, etc.

Kaptrack (1y 6mo)

Python, Django,
GraphQL, PostgreSQL

Kaptrack is a survey application designed for efficient data capturing, tracking, and analytics. It helps collect responses, monitor survey progress, and analyze data to generate meaningful insights. The platform ensures accurate data management and visualization, making it a valuable tool for organizations looking to track and evaluate survey-based information.

KEY FEATURES

- Peoples and Membership Management makes it easy to manage membership, communicate with your congregation, follow up with first-time guests, and much more.
- Automated Workflows Leverage automated people flows that you configure to ensure all tasks are completed and people are followed up with. Workflows ensure that nothing and no one falls through the cracks.
- Small Group Management makes it easy for you and your leaders to manage, coordinate, communicate, and care for your small groups.
- Event Management makes it easy for you and your leaders to manage church events and activities such as conferences, mission Sundays, and registrations from small group events to large-scale conferences with payment integration built-in.
- Web and Mobile Giving management makes it easy for your members and community outreach to engage people to give to the vision through mobile, text, and giving tools that integrate with your CristoO+ and your accounting system

ROLES AND RESPONSIBILITIES

- Designed the back end of the application using Python Django, and GraphQL.
- Develop consumer-based features and applications using Python and Django in test-driven Development and pair-based programming.
- Good experience in developing web applications and implementing Model View Control (MVC) architecture using server-side applications like Django
- The expertise of GraphQL's query mutation functionalities to perform CRUD operations at work
- Functionalities for Fortis Payment integration established with the church management application.
- SMS Gateway Configuration with the application.
- Worked with AWS S3 service for storage.
- Kubernetes was used as the best ecosystem to deploy and manage Micro-services.
- Connected continuous integration system with GIT version control repository and continually built as the check-ins come from the developer.
- Strongly self-motivated, and willing to assume responsibilities.
- Can work independently, lead, or work within a team environment.
- Good organizational and communication skills, both oral and written.

ROLES AND RESPONSIBILITIES (AGILE)

- Performed feasibility analysis for the user stories in the Product Backlog and identified test scenarios/test objectives
- Participated in Daily scrum meetings.
- Reported overall sprint status and daily status.

SPECIALTIES

- Ability to lead a Team and work as a Team Member with effective Communication and Interpersonal skills.
