

VEERAMANIKANDAN K

FULL STACK DEVELOPER

I+91 7708525195 | veeramanikandanart@gmail.com | <https://github.com/creative-soulz>

SUMMARY

Full Stack Developer with 1.2+ years of hands-on experience building, maintaining, and scaling production-grade web applications using FastAPI, Django, React.js, PostgreSQL, and Docker. Experienced in handling multiple live projects simultaneously, working with foreign clients, and owning features end-to-end from backend APIs to frontend delivery. Strong in debugging production issues, database design, and building secure, role-based systems.

TECHNICAL SKILLS

Backend: FastAPI, Django, REST APIs	DevOps & Tools: Docker, Git, Linux
Frontend: React.js, JavaScript, HTML, CSS, Tailwind CSS	Other: JWT Authentication, Role-Based Access Control (RBAC), API Integration, Production Debugging
Database: PostgreSQL	

PROFESSIONAL EXPERIENCE

BoscoSoft Tech, Yelegiri Hills.	oct 2024 - Present
- Actively working on 3–4 production applications simultaneously, handling development, maintenance, and bug fixes. - Designing and developing RESTful APIs using FastAPI and Django. - Building responsive and maintainable frontend features using React.js. - Designing and managing PostgreSQL database schemas. - Debugging and resolving production-level issues to ensure system stability. - Collaborating with internal teams and foreign clients to deliver features on time. - Working with Dockerized applications to ensure consistent development and deployment environments.	

EDUCATION

Bachelor of Computer Application	May 2021 - May 2024
Don Bosco College (Co-ed), Yelagiri Hills, Tirupattur dt, TamilNadu.	

PROJECTS

Hostel Management System (HMS) - Tech Stack: FastAPI, React.js, PostgreSQL - Developed and maintained a Hostel Management System for a foreign client to manage hostel operations efficiently. - Implemented backend APIs using FastAPI for managing students, rooms, payments, allocations, and records. - Designed and integrated PostgreSQL database schemas for reliable data handling. - Built user-friendly admin and staff interfaces using React.js. - Handled production bug fixes and feature enhancements across multiple releases.
--

- **Solai – Document Management System**

- Tech Stack: FastAPI, React.js, PostgreSQL
- Designed and implemented a multi-level document management system for organizational use.
- Enabled secure document upload, storage, and retrieval with hierarchical access control.
- Built REST APIs using FastAPI and integrated them with PostgreSQL.
- Developed React-based interfaces for managing and browsing documents.
- Implemented role-based access to ensure data security across different organizational levels.

- **CSDDD Compliance Project**

- Tech Stack: Django, React.js, PostgreSQL, Docker, Tailwind CSS
- Currently working on a compliance-focused web application.
- Developing backend logic and APIs using Django.
- Building frontend components using React.js and Tailwind CSS.
- Containerized the application using Docker for consistent environments.
- Actively contributing to feature development, bug fixes, and overall application stability.

KEY RESPONSIBILITIES & CONTRIBUTIONS

- Backend API development and integration
- Frontend development with React.js
- PostgreSQL database design and optimization
- Debugging and fixing production issues
- Maintaining and enhancing live applications
- Working with Dockerized systems

EXPERIENCE SUMMARY

- 1.2+ years of professional experience
- Multiple live projects
- Foreign client exposure
- End-to-end full stack development
